

CAN YOU RECYCLE A HOUSE? – WORKSHEET

Watch the Bingo Education Video (<https://www.youtube.com/watch?v=coryjQCb03U>) and then complete the following worksheet to show your understanding of how a house can be recycled.

1. Complete the flow chart below by writing each of the steps into the correct position in the sequence.

house is knocked down
remaining waste placed on conveyer belt and sorted into categories
construction waste taken to bingo recycling centre
materials made into a new product
residual waste (smallest pile) taken to landfill
construction waste placed into a skip bin
metal collected with a magnet
each sorted category taken to a recycling facility

2. List the six categories waste is sorted into at the Bingo Recycling Centre:

1.	4.
2.	5.
3.	6.
