

Aquaponics Design Sheet

Use this sheet to help you develop a design for your aquaponics system.

Name:

Date:

My aquaponics system will be designed for (circle one):

Indoors (kitchen/bedroom)

Indoors (living area)

Outdoors (small garden)

Outdoors (large garden)

My aquaponics system will (circle one):

Be a stacked design with the plants above the fish tanks.

Be a side-by-side design with the plants next to the fish tank/

Involve a connection between a pond and garden with a distance between them.

Sketch your design here...

Check that your design has:

- A fish tank or pond.
- An air supply to the fish tank/pond.
- A plant growing area.
- Gravel to support the plants.
- Pipes to connect the planting area and tank/pond.
- Pumps to ensure water continuously moves through the two parts of the system.

If you forgot to include something, go back and edit your design!

Things I need to make my design (list below):

Now go and make it!
