

Experiment Proposal Template

The aim of this experiment/field work is:

Hypothesis:

Resources we will need are:

This is our plan of action:

Step 1.

Step 2.

Step 3.

Step 4.

Step 5.

Experiment Proposal Template

To make this experiment/field work valid, this is the data we need to collect (consider scope, amount):

We have identified the following variables:

Independent:

An independent variable is an element or influence that can be controlled in order to test the effects on the dependent variable. ([Source](#))

Dependent:

A dependent variable is directly affected by changes to the independent variable. Changes to the dependent variable are what the experimenter will measure. ([Source](#))

Confounding:

A confounding variable is an outside influence that changes the effect of a dependent and independent variable. ([Source](#))

Notes:
