

Bird Observation Checklist

Look for...	Add a tick or make some notes here...
A bird that flaps its wings when it flies	
A bird that doesn't flap its wings and just soars instead	
A bird flying on its own	
A group (flock) of birds flying together	
A bird catching some insects	
A bird eating nectar	
If you're near water, a bird that is fishing	
A bird hiding in a tree	
Where are birds flying? Are they soaring high in the sky? Are they making short trips between trees or buildings? Or are they making short hops between branches in the same tree? Or are they walking around on the ground or in the trees?	
How well do the birds land? Do they land smoothly or do they seem to crash?	
Do they make any noises when they take off?
