

Year 3 Scenario

Scenario -

Read through the following fictional scenario shared by students at Murray Heights Primary School:

On a school excursion to our local creek we noticed a section of the path where there wasn't any shade, where it was very quiet and we didn't see a single bird. We realised that there weren't many trees along this section of the footpath. We spoke to a gardener at the park and she said the gap in the trees was caused by a small fire a few years ago. Now it means that baby birds at the park have nowhere to hide when going for a drink. The gardener says that the local Landcare group has planted one or two trees here but they don't have approval from the council to plant any more trees.

Questions -

Work collaboratively to answer the following questions about this scenario:

1. What happened?
2. Where did it happen?
3. Who is involved?
4. Why did it happen?
5. When did it happen?
