Secondary Succession After A Bushfire

- **Fire**: Grass tree and tree fern shoots
- **First few months**: Lignotuber shoots
- **Up to 6 months**: Seed shoots, Annuals
- **3 to 4 years**: Grasses, Perennial plants
- **5 to 150 years**: Shrubs and saplings established
- **150+ years**: Mature forest

The diagram shows the stages of secondary succession after a bushfire, from pioneer species to climax community.
